

Michigan Wind 3

Michigan Wind 3 is an investment in the future of the Sanilac County community.

- Michigan Wind 3 will provide an estimated \$50 million in economic benefits for Sanilac County over the life of the project.
- During construction, the Michigan Wind 3 project will create more than 120 jobs, and it will provide a number of full-time jobs once complete.
- Exelon estimates between \$20 million and \$25 million in tax revenues will be paid to local communities in Sanilac County over the life of the project.
- There will be positive economic benefits to the local business community in the construction, retail and hospitality industries.
- Since 2008, the U.S. wind industry has generated more than \$100 billion in private investment.

Michigan Wind 3 will be a clean, safe and reliable source of power for Michigan electricity customers

- Michigan Wind 3 will produce enough electricity annually to power 44,000 Michigan homes, while generating no water or air emissions.
- The project's 68 wind turbines will prevent the release of more than 230,000 metric tons of carbon dioxide annually, the equivalent of taking more than 48,000 passenger cars off the road.

ABOUT THE PROJECT

Michigan Wind 3 is an Exelon Generation project being built in Sanilac County, Michigan. The 68-turbine project will have a total capacity of 153 megawatts.
